

Instruction manual for GMT watches

REF. 97WA214213 & 97WA214214

Dear Customers,

This document is the instruction manual for 26 SPIRITS OF SWITZERLAND GMT WATCHES. First of all, thank you! Now let's see how to use the RONDA 505.2401. This is the movement used in your watch.

To do so, please [click here](#)

It's an important document to read in order to understand how to set the correct time. Now let's see how the world times function works. Set the actual time with the hour & minute white hands.

Example only :

Now you wish to know the time in Paris, whereas you may be in NYC, you have to set the GMT hand facing the #16 of the outer circle on the dial. Paris is 6 hours ahead of NEW YORK. When your watch is set accordingly, if you want to read others indicated cities time, you need to move the rotating bezel (where city names are engraved) and you fix Paris in front of the GMT hand tip.

The bezel will then tell you the time of the others cities by reading the outer numbers next to the name of cities engraved. Finally, as the bezel is not automatically moving along with the GMT hand, it's important you manually adjust the bezel when you need to read international times.

In case of any question, you can contact us contact@26spirits.ch

With best wishes,
